Anghamify APIs docs

Thursday, September 27, 2018   5:03 PM

The APIs endpoint is => https://anghamify.cf/v1/

Note to :
>Not all the response JSON data values are described here because they are so explicit you have to explore the response values.

Routes :

POST - **/search** :
>To post a search query by passing query with POST request body as JSON format
>EX:
> - post a search request with Sia query
>>https://anghamify.cf/v1/search
>>Body:
>>>{
>>>>"query": "Sia"
>>>}

GET - **/data** :
>To get any object JSON data passed as querystring with the object id
>>**Objects types :**
>>- song
>>- playlist
>>- discover - Please notice to the discover object doesn't require an object id
>
>EX:
>- get the playlist object with id 6471050
>>https://anghamify.cf/v1/data?objectid=6471050&type=playlist
>- get the song object with id 41309317
>>https://anghamify.cf/v1/data?objectid=41309317&type=song
>- get the discover object - **WITHOUT OBJECT ID**
>>https://anghamify.cf/v1/data?objectid=&type=discover
>
>**Note to :**
>>The **/data** route with **song** as an object type will return some important values
>- **cached** : is a boolean value describe if the song is already cached in the server or null if not.
>- **location** : is a string value contains the direct stream link form Anghami's servers **ONLY USE IT FOR LIVE STREAM SO DON'T DOWNLOAD THEM.**
>- **url** : is a string value contains the download direct link **Will be null if the song is not cached on the server - AND YOU HAVE TO SEND A REQUEST CAHCE WITH /download ROUTE.**

GET - **/download** :
>To send cache request for a song by sending song id with querystring with a quality
>>**Qualities :**
>>- 64 = 128K
>>- 128 = 160K
>>- 196 = 320K

EX :

- cache song with id 18126138 and 64 quality
https://anghamify.cf/v1/download?songid=18126138&hqbit=64

Note to :

The song request will may take some time up to 30 seconds effected by the song size and the server loading, the request will be open until the caching finished and will response with the
- The song id
- The download url

THE SONG QUALITY FUNCTION IS NOT WORKING NOW FOR SOME REASONS.

GET - /downmanger :

To download a song with song id

EX :

- download the song with id 250866420
https://anghamify.cf/v1/downmanger?songid=25866420

Note to :

The song must be cached first or 404 error will be responded.
The response will be the final mp3 song.
